Profile

Frontend Team Lead at Tracewave Transparency with 5+ years of experience designing and developing scalable, high-performance, and SEO-optimized web applications. Expertise in React.js, Next.js, TypeScript, and modern frontend ecosystems, with additional experience handling Node.js and MongoDB for full-stack solutions.

Specialized in performance optimization, Core Web Vitals improvement, SEO best practices, and Vite configuration tuning to ensure lightning-fast and smooth user experiences. Successfully deployed projects on AWS, Vercel, Netlify, Hostinger VPS, and Firebase, implementing serverless APIs to deliver end-to-end digital solutions.

Experience

Tracewave Transparency — Frontend Team Lead   November 2024 — November 2025

Leading a team of frontend engineers to design and develop scalable, SEO-optimized, and high-performance web applications using React.js, Next.js, and TypeScript.

- Optimized Core Web Vitals and implemented code-splitting and lazy loading for performance gains.
- Deployed and maintained full-stack projects on AWS, Vercel, Netlify, and Hostinger VPS.
- Configured serverless APIs and CI/CD pipelines for production-ready deployments.
- Mentored junior developers, improved coding standards, and enhanced developer efficiency.

Panva Tech — Senior Software Engineer   May 2024 — September 2024

Designed pixel-perfect web applications and reusable React components.

- Implemented responsive UIs with Tailwind and Bootstrap.
- Optimized renders and reduced bundle sizes for faster load times.

Orail Optigo Apps — Software Engineer   March 2023 — May 2024

Built eCommerce frontend features and integrated APIs for invoicing and payments.

- Led frontend integration with backend APIs and ensured secure data handling.
- Worked on performance optimization and end-to-end testing.

Decode Softtech — Junior Software Engineer   August 2020 — February 2023

Contributed to responsive web apps using React, Bootstrap, and Tailwind, and assisted with UI/UX implementation and bug fixes.

Skills

Design Skills   Web Design   Graphic Design   Print Design

Frontend Development   HTML5   CSS3   Bootstrap   Tailwind   JavaScript   TypeScript   jQuery   React.js   Next.js   Socket.IO

Payment Integration   Razorpay   Paytm   GooglePay

Backend Development   Node.js

Databases   MongoDB   Firebase   Supabase

Deployment & Hosting   AWS   Hostinger   Vercel   Netlify   FileZilla

Other Languages & Tools   Python   Git   GitHub Desktop

Languages

Hindi (Native) English (Professional) Gujarati (Fluent)

Some of my Work

Sundance Film Festival

Design & Development (React.js)

- Worked on designing and developing the user interface using React.js. Implemented interactive film schedule viewer, ticket booking, and user profile features.

Diamond Connect (Baseball Cloud)

Design & Development (React.js)

- Designed and developed analytics dashboards for player tracking, performance reports, and team management using React.js.

IPO-Trend

Full Project Development (React.js / Vite)

- Built the website from scratch, added new features, and managed ongoing maintenance. Developed frontend logic, and ensured performance optimizations.

Truepay Loan App

Full Project Development (React.js / Vite → Next.js)

- Designed and developed the loan application from scratch, migrated to Next.js for improved performance, and led junior developers on feature implementation and bug fixes.

ChatmyAstrologer

Design & Development (React.js / Vite)

- Built astrology chat platform with payment functionality. Developed from scratch and managed junior developers for ongoing feature enhancements.

Traceability & Transparency

Design & Development (Next.js / TypeScript)

- Maintained and designed website features including Google Meet integration with Google Calendar and Supabase. Responsible for frontend development and feature implementation.
